Research Interest

My interests lie in the integration of compliant control and machine learning for the design, modeling, and control of soft and continuum mechanical systems, with a particular focus on bio-inspired robotics where rigid-body paradigms are limited. I am especially drawn to embodied intelligence and impedance-shaped interaction, exploring how the natural dynamics of compliant bodies can be harnessed instead of canceled, to achieve dexterous manipulation and adaptive locomotion. My goal is to develop principled frameworks for perception and control that enable robust and versatile behavior in contact-rich environments.

Education

EPFL Master Thesis - Thesis title: “Vision-based Soft Robotic Arms Reconstruction and Closed-loop Control”. - Advisors: Prof. Josie Hughes (EPFL) and Prof. Francesco Braghin (PoliMi) – 6.0/6.0 grade.	<i>Feb 2025 - Aug 2025</i>
Politecnico di Milano MSc Data Science for Industrial Engineering Focus on machine learning, autonomous vehicles, and digital twinning – 28.90/30 GPA.	<i>Sep 2023 - Oct 2025</i>
EPFL Swiss-European Mobility Programme (SEMP) Semester abroad on advanced control systems and data-driven design – 6.0/6.0 GPA.	<i>Feb 2025 - Aug 2025</i>
Alta Scuola Politecnica Multidisciplinary Honors Program 30 ECTS in innovation and mechanical design, joint program of PoliMi and PoliTo.	<i>Jan 2024 - Dec 2025</i>
Politecnico di Milano BSc Mechanical Engineering Grade: 110/110 with honors – 29.52/30 GPA.	<i>Sep 2020 - Sep 2023</i>

Research and Work Experience

Student Researcher, Master Thesis <i>CREATE Lab</i> 🔗 Feedback control of a bio-inspired soft robotic trunk via CNN-based shape reconstruction.	<i>Lausanne, Switzerland</i> <i>Feb 2025 – Aug 2025</i>
Student Researcher, VinPRO Project <i>PIC4SeR</i> 🔗 Development of an autonomous pruning robot combining mechanical design, computer vision, and control.	<i>Turin, Italy</i> <i>May 2024 – Jul 2025</i>
Student Worker <i>Erasmus Plus</i> 🔗 Project management: a technology-driven festival on Italian culture.	<i>Londonderry, UK</i> <i>Jun 2019 – Jul 2019</i>
Internship <i>WASP Srl</i> 🔗 Data collection on Delta Wasp printer performances and clay feedstocks, calibration, and assembly.	<i>Massa Lombarda, Italy</i> <i>May 2018 – Jul 2018</i>

Fellowships and Awards

Alta Scuola Politecnica (ASP) Scholarship Selected among the 150 best students from the Polytechnics of Milan and Turin.	<i>Jan 2024</i>
Swiss-European Mobility Programme (SEMP) Scholarship Funded coursework and research period at EPFL.	<i>Mar 2024</i>
EPFL Master Thesis Funding Funded Master Thesis project at EPFL.	<i>Feb 2025</i>

Selected Projects

Autonomous Vehicles - Path Planning and Navigation Implementation of path planning and autonomous navigation algorithms in ROS and Gazebo.	<i>Sep 2024 - Jan 2025</i>
Digital Twin of Pressure Vessel and Battery Degradation Twin modeling with surrogate models, Metropolis-Hastings, and Particle Filter for RUL estimation.	<i>Oct 2024 - Feb 2025</i>
Blood cells classification and Mars terrain segmentation Computer vision tasks with CNNs and U-Net on biomedical and Mars datasets.	<i>Oct 2024 - Dec 2024</i>
Data-driven Optimization of a Soft Tentacle Swimmer Optimized thrust and velocity of a soft robotic swimmer using surrogate models and Genetic Algorithms.	<i>Feb 2025 - Jun 2025</i>
